

RAYYAN NAFEES

AI System Design Architect

Profile

I am an AI systems Architect adept at architecting and integrating advanced generative AI solutions that elevate user experiences and shape innovative product roadmaps. My professional identity is anchored in a comprehensive command of fullstack development and system architecture, enabling me to lead teams in crafting robust, scalable AI-powered features from conception to deployment. Driven by a deep enthusiasm for logical problem-solving and the pursuit of innovative approaches, I bring a methodical engineering perspective to designing and realizing impactful technological advancements. Explore my portfolio at rayyano.vercel.app.

My Skills

Backend:

- **NodeJS:** Express, Fastify, Hono, NestJS
